Hong Kong SAR | +852 60413094 | c60413094@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio Website](#)

A computer science student who is eager to build a strong future career and achieve a good position in the tech industry. I am committed to studying hard, improving my skills, and working consistently toward my goals. With a strong work ethic and a willingness to learn, I hope to grow both academically and professionally through every opportunity I receive.

EDUCATION

Bachelor of Computing in Computer Science	08/2023 - 06/2027
City University of Hong Kong	
High School Diploma	09/2016 - 08/2023
Liu Po Shan Memorial College	

WORK EXPERIENCE

Information Technology Intern Sanfield (Management) Limited	08/2025 – 04/2026
- Developed a bilingual (Chinese/English) RAG-based Q&A chatbot using React, Flask, Oracle Database, and Ollama, achieving 98%+ answer accuracy across large internal knowledge bases. - Built an internal management dashboard with CRUD functionality for Q&A content and one-click vector database regeneration, significantly improving knowledge base maintenance efficiency for non-technical staff. - Implemented Neuron Mind App, a full-stack React + Flask application that generates LLM-powered mind maps and Markdown summaries from uploaded documents. - Maintained and enhanced Project-mastar, a company project tracking system, by resolving 83 bugs and delivering new features that improved system functionality and user experience. - Developed a company website for GCL based on client requirements, translating business needs into a functional web solution. Tools: Python, ReactJS, Flask, MySQL, Docker, RAG, Ollama, Open-WebUI, n8n	
Programme Assistant Intern Y-LOT Foundation Limited	08/2024 – 08/2024
- Developed 1-hour and 5-hour Python curricula for students, supporting internal teaching delivery and reducing reliance on outsourced materials. - Evaluated external Python curricula, identified defects, and provided improvement feedback to vendors. - Conducted web scraping and data cleaning to compile 4,115 targeted email contacts from companies and professors for competition outreach. Tools used: Python, JavaScript, Web scraping extension, MS Excel, MS Word	

STUDY & PROJECT EXPERIENCE

RAG Q&A Web App with Vector Database and LLM Integration Python, Js, Flask, Restful API Github link
- Built a Flask-based Q&A application leveraging MySQL, FAISS vector databases, and large language models (LLMs) to provide natural language answers over company knowledge. The system supports both Chinese and English with over 95% accuracy, handles datasets exceeding 1,000 entries, and delivers responses within 5 seconds.
Canada Vehicle Emissions Analysis R Github link
- Built an R project that transformed and explored Canada vehicle emissions data, then applied linear regression and diagnostic checks to study key emission factors. Also used a chi-square test to compare emission test failures across vehicle categories, with final findings shown through clear visualizations.
My Own Personal Blog Html, CSS, JavaScript Website link
- A personal blog where I share my thoughts on life and reflect on my own experiences.
Extrovert vs. Introvert Behavior Data Analysis Python Github link
- Data analysis on finding the key value. Create threshold to train the model out using Logistic Regression and test it.
Object-Oriented System Design Project Java, BlueJ, Visual Paradigm Github link
- Software Designing using use case, class and sequence diagrams. Finish it using prototype, ppt and report

LANGUAGES, SKILLS & INTERESTS

Languages: Cantonese (Native), English (Fluent), Mandarin (Fluent)

Programming: Python, Java, C++, JavaScript, SQL

Frameworks & Tools: React, Node.js, Express, Flask, MongoDB, Mongoose, MySQL, Docker, FAISS, Ollama, Postman

Interests: AI Applications, Data Analysis, Philosophy, Lifelong Learning, Fitness, Investing
